**CIRCULAR KNITTING MACHINE, CYLINDER, INVERTER & PANNEL SERIES J.K. TEX**

JIADING, CHINA/TAIWAN

JIADING SINGLE JERSEY

**Features of JIADING Circular Knitting Machine**

- High Standard Cylinder design (Circle Rate is 855.4, Height is 153 mm) Which can produce High Quality Cloth.
- There is a Valve on up plate, which is easy to clear machine and reduce jam rate which causing by flocking.
- Which made by Advanced CAXA software and process by CNC center.
- The design is made in humanistic angle, which is easy to operate for different areas; All series Machine adopt CE security design which ensure personal security of client and operator.
- Machine heart is manufactured in special materials. Cam box is processed by high-technology.
- JIADING is authorised to use Germany round dust fans with blower equipment as the sole one in china.

JIADING RIB & INTERLOCK

High Standard Cylinder Design  
(Circle Rate is 855.4, Height is 153 mm)  
Which Can Produce High Quality Cloth

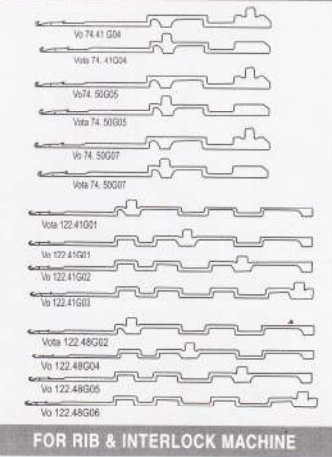

All Kinds of Inverter from Japan/Taiwan

HIGH EFFECTIVE MIST 7+N LUBRICATOR

HIGH EFFECTIVE MIST 7+N LUBRICATOR

**FEATURES:**

Taiwan made solenoid switch, regulator, filter, pressure gauge and some other components of this product boost the efficiency of operation.

Capacity : 2.75 L (It allows to work approximately for 5 consecutive days).

**FUNCTIONS:**

1. The Taiwanese-made solenoid switch, regulator, filter, pressure gauge and some other components of this product boost the efficiency of operation.
2. There are two categories of the main oil tanks with the same quality and capability.  
Capacity: 2.75 L (It allows to work approximately for 5 consecutive days)  
Capacity: 1.95L ( It allows to work approximately for 3 consecutive days)
3. Standard operation procedure after installation of the oil adding machine should include the following steps :  
(a) Keep pressure of the air compressor at 4.00kg/cm  
(b) Adjust pressure indicating on the pressure gauge of the regulator to 1.5kg/cm  
(c) Keep oil drip rate to 60 drops per minute.  
(d) Check if the oil filled in the tank meets a required level.
4. The Large Size Oil Tank: 270mm X 150mmX 279mm.  
Small Size Oil Tank : 245mm X125mmX 270mms
